# Daniel Stadler

## Full Stack Web Developer

Oakland, CA  
[github.com/dstadz](https://github.com/dstadz)  
[linkedin.com/in/danstad](https://linkedin.com/in/danstad)

### SKILLS

React || Hooks || Node || Javascript || HTML || CSS || Figma  
Python || GitHub || Agile || REST

---

### PROJECTS

#### D8 Picker

[GitHub](#)

Progressive Web App that creates and stores event templates to apply to your calendar for irregularly repeating events.

React | Node | MongoDB

- Used OAuth to connect to Google Cal API
- Developed Front End Components, testing for Front and Back End
- Crafted interface for users to interact with the calendar
- Organized PVD through AGILE workflow

#### Foodie Fun Six

[GitHub](#)

Yelp clone to store and review visited restaurants and meals

Node | Knex

- Handled server-side routing by using Knex, which led to data transfer across Front & Back end
- Managed data persistence across the app
- Used HTTP Protocol methods to access user data

#### Key Conservation

[Figma](#)

Mobile app designed to allow conservation efforts to communicate directly to followers

Figma

- Designed & Integrated comment section to text and video posts
- Graphical overhaul & UI redesign
- Worked with a group of 5 developers

---

### EDUCATION

#### Lambda School

April 2019 - Present
